

## **Right Time**

### **(Verse 1)**

I was lost in the noise of every day  
Faking smiles just to make it through  
Love felt like a game I stumbled to play  
Until the moment I crossed paths with you

### **(Pre-Chorus)**

The stars aligned with grand design  
I fell for you, when your eyes met mine

### **(Chorus)**

I found you at just the right time  
While my heart was learning how to heal  
You showed me love. Few words without rhyme  
Something honest, something real  
No fireworks, no neon signs  
Just your hand gently touching mine  
I found you at just the right time

### **(Verse 2)**

You didn't rush in, you didn't demand  
You just listened and let me unfold  
Now I'm holding your heart in my hands  
Like a secret too precious to be told

### **(Bridge)**

Maybe fate had a hand in this  
Or maybe it's just coincidence  
But I'd choose you again in every lifetime  
Because you were mine - at just the right time

### **(Final Chorus)**

I found you at just the right time  
When the silence begged for something true  
You gave me peace, you gave me rhyme  
And every breath now leads to you  
No need for signs or perfect lines  
Just your love gently wrapped in mine  
I found you at just the right time
