

Just Promise Me You'll Stay

(Verse 1)

**I've watched the seasons change your mind
Like leaves that drift and paint the sky
I'm still here when gray clouds gather
Sharing things that truly matter**

(Chorus 1)

**Stay when the silence fills the room
Stay when flowers forget to bloom
I don't need forever, not today
Just promise me you'll stay**

(Verse 2)

**We built our life with calloused hands
Through broken roads and shifting sands
The stars don't guide, they fade away
We search in silence for better days**

(Chorus 2)

**Stay through the fire, through the fall
Stay when there's nothing left at all
I'll give you every breath I've saved
Just promise me you'll stay**

(Bridge)

**I've seen your eyes drift past the dawn
Like stars unsure of where they belong
I hold the space where words once stayed
And listen to the quiet they made**

(Chorus 3)

**Stay when the silence starts to sing
Stay when winter forgets the spring
I don't need forever, not today
Just promise me you'll stay**
