

We Just Don't Have That Spark

(Verse 1)

**We laugh at all the same old jokes
You know my dreams, I know your folks
We've danced around the edge of more
But never opened up that door**

(Chorus)

**We just don't have that spark
No fire in the dark
No pull that draws us in
No heat beneath the skin
We're good, we're close, we're kind
But passion's hard to find
We could pretend, but it feels too stark
We just don't have that spark**

(Verse 2)

**We've talked about a maybe kiss
But end with "it's not worth the risk"
You're safe, you're sweet, you're always near
But something's missing when you're here**

(Chorus)

**We just don't have that spark
No fire in the dark
No pull that draws us in
No heat beneath the skin
We're good, we're close, we're kind
But passion's hard to find
We could pretend, but it feels too stark
We just don't have that spark**

(Bridge)

**It's not that I don't care for you
It's not that you don't feel it too
But every time we try to start
It fades before it finds our hearts**

(Final Chorus)

**We just don't have that spark
No fire in the dark
No rush, no breathless spin
No aching from within
We're friends, and that's a trusted role
But it never touched our souls
We could pretend, but it feels too stark
We just don't have that spark**
