

Just Us This Christmas

(Verse 1)

**The stockings are empty, the laughter is gone
Echoes of our children have all moved on
But the tree still glows, and the fire still warms
Two hearts together through winter's storms**

(Chorus 1)

**It's just us this Christmas, in the soft candlelight
Holding hands gently through a silent night
The house is much quieter, our love still shines through
This Christmas is smaller, but it's still me and you**

(Verse 2)

**The phone rings with voices from miles away
We share their stories, hear joy in what they say
The ornaments they made still sparkle and gleam
Reminders of childhood, still alive in my dreams**

(Chorus 2)

**It's just us this Christmas, though the children are grown
Their laughter still lingers, we're never alone
Their memories surround us, like stars in the sky
Love keeps us together, though years pass us by**

(Bridge)

**And someday they'll gather again by our tree
With grandkids' laughter, a new melody
But tonight in the quiet, our hearts intertwine
This Christmas is ours, your love is still mine**

(Final Chorus)

**It's just us this Christmas, and that's all we need
A lifetime of love is the greatest gift indeed
Though the years keep changing, our love still shines true
This Christmas is smaller, but it's still me and you**
