

First Night With You

[Verse 1]

**I saw you walking through the shadows of a fading streetlight
The full moon glowing, tracing your outline with a silver glow
You whispered “hello”, like someone holding onto a secret
I answered softly, with a trembling in my chest**

[Chorus]

**My first night here with you
Under an open sky, just the two of us
Stars are dancing as witnesses
To something no one else could understand
I don't know your story or the quiet storm inside your voice
The universe pulled us together**

[Verse 2]

**Your clear eyes are shining, asking questions you didn't speak
One step closer and the colors froze between us
We talked a little about places, about old scars
You laughed brightly and every fear shattered into pieces**

[Chorus]

**My first night here with you
Under an open sky, just the two of us
Stars are dancing as witnesses
To something no one else could understand
I don't know your story or the quiet storm inside your voice
The universe pulled us together**

[Bridge]

**Will you stay when the sunrise finds us waking
You whisper “maybe”, and your hand reaches for mine
If this is chance, let me lose myself inside it
Let this bright little miracle return again**

[Chorus]

**My first night here with you
Under an open sky, just the two of us
Stars are dancing as witnesses
To something no one else could understand
I don't know your story or the quiet storm inside your voice
The universe pulled us together**
