

Hard To Feel

[Verse 1]

**I feel it when you hold me, then it slowly slips away
Some nights you're right beside me, some nights your heart won't stay
Your smile says you need me, your silence builds a wall
I know your heart is in it... but sometimes I can't tell at all**

[Chorus]

**I know you love me — I do — but it's hard to feel it clear
Like a radio with static when I'm trying hard to hear
If your heart is speaking softly, I'm listening for the sound
I know you love me deeply... I just wish you'd show me how**

[Verse 2]

**You say that you're not distant, just lost inside your mind
I'm out here guessing feelings. You don't always give a sign
I'm not asking for a miracle, just something I can hold
A little warmth to chase away the moments I feel cold**

[Chorus]

**I know you love me — I do — but it's hard to feel it clear
Like a radio with static when I'm trying hard to hear
If your heart is speaking softly, I'm listening for the sound
I know you love me deeply... I just wish you'd show me how**

[Bridge]

**Maybe love is steady and sometimes love is scared
Maybe you're just fighting battles you don't know how to share
I'm here for every heartbeat, even when it's hard to tell
But I need a little sunlight in the shadows where we dwell**

[Chorus]

**I know you love me — I do — but it's hard to feel it clear
Like a radio with static when I'm trying hard to hear
If your heart is speaking softly, I'm listening for the sound
I know you love me deeply... I just wish you'd show me how**
